If you are interested in Cross Lapped Spunlace Nonwoven products, please contact with us. We follow the quality of rest assured that the price of conscience, dedicated service.

China based supplier of **Cross Lapped Spunlace Nonwoven**. It is a nonwoven fabric produced by the entangling of a web of loose fibers through multiple rows of jets of high pressure water which pierce the tissue and entangle the fibres. The fact that the two fabrics are interlinked in different directions gives it its isotropic property, the same strength in any direction.
